

Documentation:Our Blog Pro WordPress Theme

Install **Our Blog Pro** WordPress Theme within a few minutes.

Our Blog Pro is a WordPress theme dedicated to blogs. It provides a responsive layout with unlimited colors. It allows you to change the way you introduce posts for pictures and texts for an appealing look. It is modern, clean, colorful and responsive. It has multiple slider, homepage, footer, header layouts and four plus custom widgets.

Required plugins:-

1. One Click Demo Import
(<https://wordpress.org/plugins/one-click-demo-import/>)
2. Newsletter Plugins(<https://wordpress.org/plugins/newsletter/>)

Our Blog documentation: How to start?

This documentation will show you step by step how to complete the basic configuration of **Our Blog Pro**. It is important that you follow these steps carefully because some steps build up on each other and that will help you a great deal to set up your website properly:

1. How to upload, install and activate Our Blog Pro?
2. What is page and how to create it?
3. What is category and how to create it?
4. How to create menus?
5. How & where to place widgets on your website?
6. How to create posts?
7. How to add logo and site title/tagline?
8. How to adjust options & layout?

1 – How to upload, install and activate Our Blog Pro?

From WordPress Dashboard

- Login to Wordpress admin panel
- Go to > **Appearance > Themes**
- Click in **add New >Upload our-blog-pro.zip file > Install Now**
- **Activate the theme**

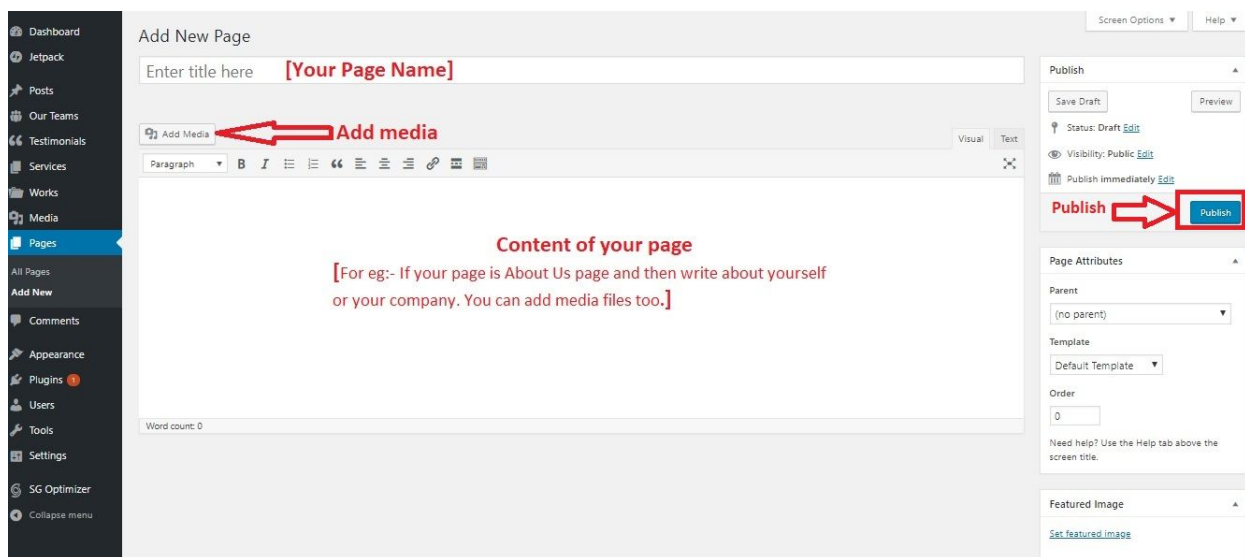

After installing the theme, now you can customize your website as per your preference.

2 –What is page and how to create it?

Pages are static and are not listed by date. Pages do not use tags or categories. An about page is the classic example. Pages can be displayed in the sidebar using the Pages widget, and some themes display pages in the navigation at the top of the site.

-To create page

- Go to dashboard
- Click in **Pages > Add New > Follow instructions as below**

- After adding all content, you can publish your page and create necessary pages by same method.

3 – What is category and how to create it?

Categories provide a helpful way to group related posts together, and to quickly tell readers what a post is about. Categories also make it easier for people to find your content. Categories are similar to, put broader than, tags.

How to create categories

- Go to dashboard
- Click in **Posts > Categories**

The screenshot shows the WordPress 'Categories' management interface. On the left is a sidebar with navigation options like Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The main area is titled 'Categories' and contains a search bar and a table of existing categories. Below the table is the 'Add New Category' form. The 'Name' field contains '[Name of your category for eg:-News]'. The 'Slug' field contains '[Slug is the name that appears in url]'. The 'Parent Category' is set to 'None'. The 'Description' field is empty. A red arrow points to the 'Add New Category' button with the text 'Click'. Another red arrow points to the 'Slug' field with the text 'You can leave blank if you want your Url same as category name'.

- You can put your own slug too, most of the time it is left blank which means name of the category itself will be its slug.
- [For eg. yoursite.com/category/category_name]
- You can put description if you want.
- Now after adding category, your category will appear in right side of the post page.
- You can add more categories in same manner.

4 – How to create menus?

This theme comes with one menu locations. **Primary**.

Our Blog

Primary Menu

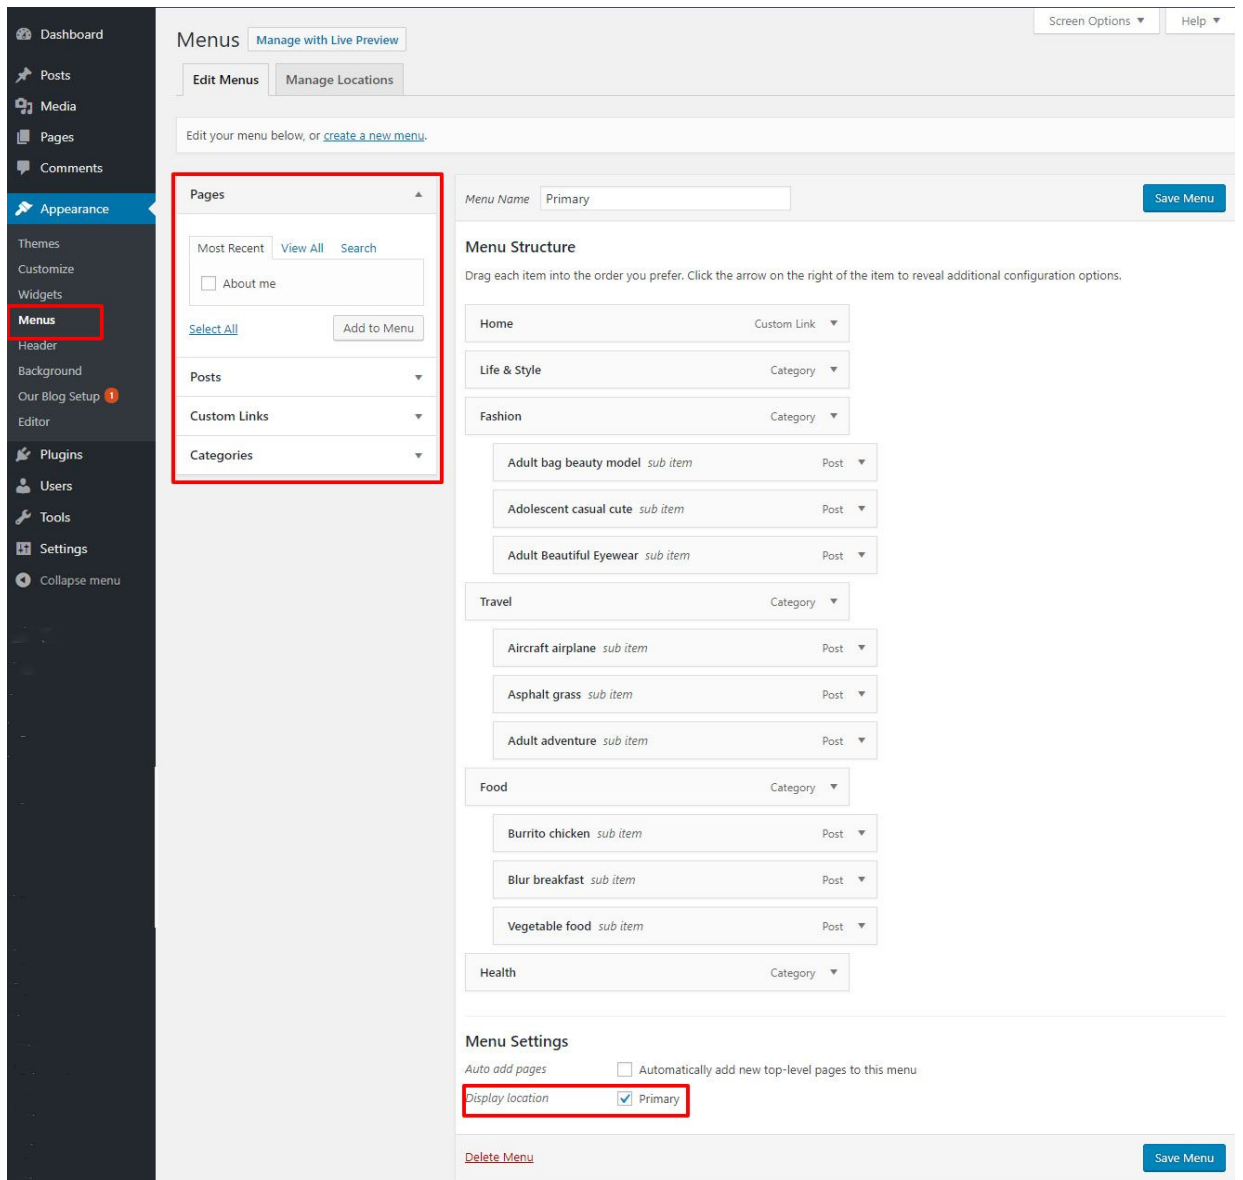

Home Life & Style Fashion Travel Food Health

You can create menus in **two ways**.

- **Appearance=>Customize=>Menus=>Create New Menu**
- **Appearance => Menu**(We **RECOMMENDED** this Option for creating menus.)

The screenshot shows the WordPress 'Menus' management interface. The 'Create a new menu' button is highlighted in red. The 'Menu Name' field is set to 'Primary' and the 'Create Menu' button is highlighted in red. The interface also shows a list of menu items and a search bar.

- Create **New Menu** [You need to create only one menu]
- Give name of the menu[For eg. Primary Menu] > **Create Menu**

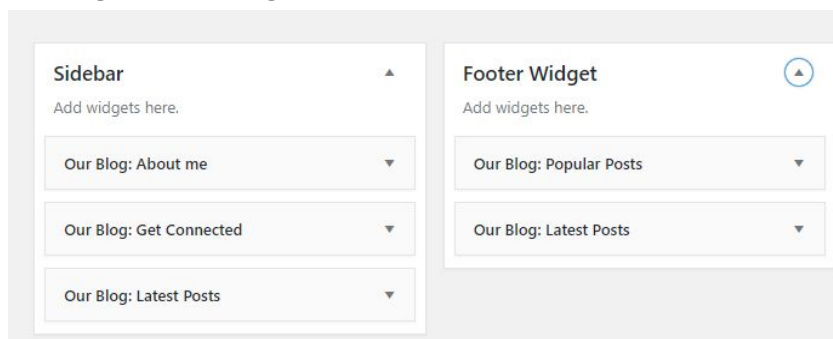

5 - How & where to place widgets on your website?

In this important step, we will show you where and how to place widgets. You can place widgets either through two ways:-

- **Appearance => Widgets**
- **Appearance => Customize => Widgets**

Note:- Widgets can be placed simply via drag and drop, so just pull your favored widget to the widget area you like.

Our registered widgets:-

Here you can see the **Available widgets** areas of **Our Blog** WordPress Theme.

Available Widgets

To activate a widget drag it to a sidebar or click on it. To deactivate a widget and delete its settings, drag it back.

Archives	Audio
A monthly archive of your site's Posts.	Displays an audio player.

A cloud of your most used tags.	Arbitrary text.
Video	
Displays a video from the media library or from YouTube, Vimeo, or another provider.	

6 - How to create posts?

Now after all set, you can start writing your post. Follow these steps

- Go to dashboard > **Posts** > **Add New**

Word count: 0

Choose categories

Include 2/3 tags

Upload Featured Image

- Finally, click in publish Button. You can preview your post before actually publish it just make sure everything is ok. If you have not completed writing your post then you can save it as draft.

7- How to add logo and site title/tagline?

With **Our Blog**, you may customize your logo and site title/tagline in many different ways. To upload a logo and display/hide the site title and tagline, you can navigate to **Appearance => Customize => General Settings => Site Identity** and apply your changes based on your personal requirements.

Customizing > General Settings > Site Identity
